Profile

Computer Science student and junior software developer interested in full-stack development, mobile applications, backend systems, AI/OCR, and cybersecurity.

I have experience building academic and personal projects using Java, C#, Python, JavaScript, TypeScript, React Native, FastAPI, ASP.NET Core, PostgreSQL, TensorFlow, and OpenCV.

I am still learning and improving my skills, and I am looking for a student or junior software engineering position where I can gain real industry experience, learn from professional engineers, and contribute to real projects.

B.Sc. in Computer Science

Netanya Academic College, Israel

Expected graduation: 2027

Coursework expected to be completed by June 2026

Relevant coursework:

Algorithms, Data Structures, Operating Systems, Computer Networks, Databases, Automata and Formal Languages, Linear Algebra, Logic, Software Engineering

Technical Skills

Programming Languages:

Java, C#, Python, JavaScript, TypeScript, SQL, C

Frontend / Mobile:

React Native, Expo, HTML, CSS, Responsive UI

Backend:

FastAPI, ASP.NET Core MVC, REST APIs, Authentication basics

Databases:

PostgreSQL, SQL Server, SQLite, Entity Framework Core

AI / Computer Vision:

Basic experience: OpenCV, OCR, image preprocessing, TensorFlow/Keras basics

Tools:

Git, GitHub, VS Code, Visual Studio, IntelliJ IDEA, Postman, Linux basics

Cybersecurity Basics:

Secure coding basics, Semgrep, CodeQL, manual code review, vulnerability research basics

Projects

Hebrew OCR Recognition App

Technologies: React Native, Expo, FastAPI, Python, TensorFlow/Keras, OpenCV, PostgreSQL

Mobile application for recognizing Hebrew text from images.

What I worked on:

- **Built a React Native mobile interface for uploading images.**
 - **Created backend API endpoints using FastAPI.**
 - **Worked with OCR and image preprocessing using OpenCV.**
 - **Tested TensorFlow/Keras models for Hebrew text recognition.**
 - **Displayed Hebrew text results with RTL support.**
 - **Saved recognition history and basic statistics.**
-

Sudoku Solver and Helper App

Technologies: React Native, Expo, FastAPI, Python, Algorithms

Mobile application for playing Sudoku and getting solving help.

What I worked on:

- **Built the Sudoku board UI in React Native.**
 - **Added features such as notes, hints, undo, erase, mistakes, and game status.**
 - **Created backend logic for solving Sudoku puzzles.**
 - **Worked on puzzle generation and difficulty levels.**
 - **Stored game progress and statistics.**
-

Campus Management System

Technologies: ASP.NET Core MVC, C#, PostgreSQL, Entity Framework Core, Bootstrap

Academic management web application with different user roles.

What I worked on:

- **Built web pages using ASP.NET Core MVC and Razor Views.**

- Created student, lecturer, and admin roles.
 - Worked with authentication and authorization.
 - Connected the application to PostgreSQL using Entity Framework Core.
 - Designed responsive pages using Bootstrap.
-

Cacti Security Research

Technologies: PHP, Linux, Semgrep, CodeQL, Manual Code Review

Performed security research on the Cacti open-source monitoring platform in a controlled local lab environment.

What I worked on:

- Used Semgrep and CodeQL to scan PHP source code.
 - Practiced manual code review for secure coding issues.
 - Studied unsafe command execution patterns.
 - Identified a potential security issue during local research.
 - Prepared and submitted a responsible disclosure report to the Cacti maintainers.
 - Currently waiting for maintainer review and triage.
 - Documented the issue with a clear summary, technical details, proof of concept, and impact.
-

Languages

Arabic: Native

Hebrew: Fluent

English: Good technical proficiency

Soft Skills

Fast learner, problem solver, self-motivated, teamwork, willing to learn, good debugging skills, responsible and honest
